

Gerson 2130 N95 Respirator Mask

Model 57000

This NIOSH certified and FDA approved surgical mask is the first line of defense in a pandemic or other bio-emergency. It aids in preventing the inhalation of viral pathogens. This mask meets CDC Guidelines for Swine & Avian Influenza, as well as for TB, SARS, Smallpox, and Anthrax. It has the highest level of ASTM fluid resistance, 160mm Hg and the lowest breathing resistance in its class. There are no uncomfortable pressure points. Mask is durable, with ultrasonically welded headbands.

- Passes the stringent 160mm Hg fluid resistance test
- Lowest breathing resistance in class
- Durable. Ultrasonically welded non-latex head bands
- 3-D cup shape with "away-from-the-face" design for comfort and non-muffled conversation

Approvals	NIOSH certified and FDA approved for surgery
Material	Electrostatically charged filtration media
