

Product Specifications

Professional Eyeglass Frame Face Shield

DeltaTrak's Professional Eyeglass Frame Face Shield helps prevent transmission of infection by offering full coverage (from forehead to chin) against saliva and other droplets. The shield is highly transparent with anti-fog coating to greatly improve visibility, and is easily removed for cleaning and replacement. The comfortable eyeglass frame and lightweight shield can be worn for a length of time, built-in nose pads provide additional comfort and help prevent slipping during wear.

Schools

The Professional Eyeglass Frame Face Shield provides sturdy protection and high transparency and visibility for teachers as they interact with students during classroom activities.

Clinics

Ideal for shielding medical and office staff during patient check-ins and/or examinations. High visibility and transparency allows for improved patient interaction.

Food Service and Hospitality

Provides safety and coverage for service staff when interacting with customers. The strong anti-fog coating allows for clear view of customers which helps improve the customer service experience.
