RTL Prime 3G In-Transit Logger

Ship to more locations with expanded 3G coverage!
Singapore, South Korea, Japan, Australia, New Zealand, Italy and UK

Know the temperature and location of your products at any time!
Track deliveries using a cloud based service and see real-time route information and conditions in a shipping container and truck. Flight mode allows use on airplanes. The light sensor provides an added layer of security for your shipments.

The RTL Prime 3G In-Transit Logger sends data to a web account where it's always available, even before a shipment reaches the receiving dock. Reliable up-to-the-minute information is accessed with a standard web browser, using a PC or any internet-ready device. Alerts are automatically sent when out-of-range conditions occur.

- Monitors location, temperature and light
- Data transmitted via GSM cellular networks
- 2-in-1 backup onboard PDF logger feature
- No need to open vehicle doors to access information
- 24/7 cloud service to view and analyze data remotely
- Make immediate cold chain management decisions
- Data stored in the cloud for traceability, audits, HACCP, and FSMA compliance
- Reroute trucks when necessary
- Customize settings for high/low alarm limits
- 12 month battery shelf life
